DEAR CUSTOMER,

If you’re an owner of a Pelican Protector™ case, you are already familiar with our legendary toughness and quality. In my role at Pelican I’ve listened with great pride to many amazing stories of our cases in action – withstanding shifting glaciers, IED explosions and Silverback gorillas. These stories are featured within and many more at http://www.pelican.com/info/media-testimonials/. Please log in to share your own incredible stories.

Again, thank you for placing your trust in Pelican for your equipment protection needs. We continue to develop the toughest and most dependable cases on the market. We are excited to share our latest innovations and associated pictures are just too good not to share, so we’ve featured the best in this catalog.

We’ve worked hard to meet the needs of our constantly expanding customer base, which includes extreme coolers, luggage and iPad®/iPhone®-specific cases, just to name a few. To see our up-to-the-minute product introductions, visit www.pelican.com or follow us on our social media channels.

And finally, Pelican couldn’t have become the global company that it is today without the loyalty of our customers (soldiers, firefighters, police officers, photographers and sportsmen), as well as our many other new customers (consumers and outdoor enthusiasts) who depend on our products every day. Please know that we will continue to honor that trust by developing the toughness and quality that you demand.

Toughness is always in style. For more information about our products and world-class customer service, visit www.pelican.com. For sales inquiries, please contact your local distributor or our sales team at 1-800-766-0006.

Thank you for your support.

Sincerely,
Lyndon Faulkner
CEO and President

THE SCIENCE BEHIND LIGHTNESS

- Honeycomb structural elements that are actually stronger than solid polymer material.
- Molded from the next generation of Pelican’s lightweight HPX™ resin, a proprietary formula that rebounds without breaking.

UP TO THE TEST

- Submerged for 30 minutes at a depth of one meter.
- Drop-tested on concrete (with loads from six feet) on all sides and corners.
- Wheels are roll tested over 1,000 yards with loads at 5 mph.
- 28 lb. steel dart dropped on all sides from 3 feet.

At up to 40% lighter than other polymer cases, Pelican™ Air cases will lighten the loads of the dedicated pros around the world who have set out to change the game.

Pelican™ Air cases are the first in a series of remarkable innovations engineered by Pelican, the pioneers of protective cases. For over 40 years Pelican has manufactured the most influential protective cases in the world, and we’re just getting started.

With the launch of the Pelican™ Air line of cases, we’re redefining the future of protection with a remarkable union of light and tough.

The lightest protector cases on the planet.

Pelican™ Air cases are the first in a series of remarkable innovations engineered by Pelican, the pioneers of protective cases. For over 40 years Pelican has manufactured the most influential protective cases in the world, and we’re just getting started.

### Additional Features

- WATER RESISTANT SEAL
- LIGHTWEIGHT INSERT LINER ABSORBS SHOCK AND PROTECTS MEMORY CARDS
- MADE OF TOUGH POLYCARBONATE RESIN
LIGHTWEIGHT, but extremely strong; compact, yet fully capable. Perfect for valuable gear like hand tools and small to medium electronic components, hand held GPS systems, and DSLR cameras. All small cases are available empty or with pre-scored Pick N Pluck™ foam.

WATERTIGHT
The secret is the tongue-and-groove fit with a Polymer o-ring acting as a waterproof seal. Also, our Automatic Pressure Equalization Valve releases built-up air pressure while keeping water molecules out, resulting in a watertight case that is easy to open.

*CASE CONTENTS NOT INCLUDED*
LONG PROTECTOR CASES

Ideal for weapons, but are also used by industrial workers for instruments and gear. Equipped with sturdy polyurethane wheels for ease of transport. All Long Cases are available empty or with solid foam (not Pick N Pluck™ foam). See chart on page 19.

All Long Cases are equipped with wheels.

**EASY RIDING**

Stainless steel ball bearing wheels (on select cases) last longer and ride smoother. The nylon hub adjacent to the stainless steel resists heat. Result: less wear and tear on the polyurethane tire.

**MINIMUM QUANTITIES APPLY, ** WITH FOAM, *** NO FOAM, **** WITH PADDED DIVIDERS

THE HORSE HAS A LOT TO SAY...
During a long trekking expedition in Zanskar and Ladakh (in Northern India) we had all our stuff on horseback. About halfway through the trip one of the horses overbalanced and fell from the track into the water. The horse was unhurt beyond a couple of scratches, but the case had been dragged underwater, banged on rocks for a good while and dragged out again. I opened the case and discovered that my Hasselblad®, my spare Nikon® body, several lenses, dozens of films and a DAT recorder and tapes for my audio work were all completely unharmed and dry.

Mike Harding, BBC presenter, travel, writer, poet, playwright. www.mikeharding.co.uk

CRUSHED ICE OPTIONAL
We chose the best gear that we could get our hands on, including Pelican™ boxes to safeguard our camera gear, radios and satellite telephone. At 81° North latitude, one of our plastic kayaks, with a Pelican™ box mounted on deck, became caught in the current-driven ice pack and was thoroughly steamrolled. Many items loaded inside the kayak were crushed, but the Pelican™ deck box emerged through it all unscathed.

Steve Smith, Adventurer

INTACT AFTER MASSIVE EXPLOSION
My team and I were first responders to a terrorist attack on a hotel in Islamabad, Pakistan. As part of our recovery effort at the blast site, we ‘repatriated’ one of our armored vehicles. Inside the vehicle, which was in the immediate impact zone of the SVBIED, we discovered an unscathed Pelican™ 1640 Transport Case. I’ve enclosed photos of the Pelican Case taken the day that we recovered it from the demolished vehicle. The case stood up against a massive explosion and flying shrapnel. We gave the case back to its rightful owner, who thankfully was not in the vehicle at the time of the attack. Seeing how well this product withstood this type of abuse, I can say that you have found yourself several new lifetime customers!

US Federal Agent

SUPERSTORM PROOF
The plane hit with such force that it sheared the left wing and flipped right off and, as the plane rapidly sank, everyone was able to escape out the exits. For over nine hours, the plane was submerged some 6-8 feet under water, loosely held to the right pontoon! When we were finally allowed to recover our gear, I was planning for the worst, because the water damage on impact had destroyed just about everyone’s gear. But when I opened the lid on my Pelican™ 1560 case, I was astonished to find that there was very little water inside and everything was intact!

Tim Cothren

PELICAN CAT-SNACK
On a recent trip through Zimbabwe the Pelican™ 1550 case became the prey of a member of the carnivore family. Shumba, less than a year old, pounced on the case and subjected it to its inch long canines. The Pelican™ case withstood its brush with the jaws of death and also the rock-bashing hike into the Zambezi valley and all the whitewater I encountered in the following weeks.

Ross O’Donoghue

TUNESIA RUINS SAVED
At remote ancient Roman ruins working on time-lapse astrophotography, packing the car at 04:00 am. A little later on a winding country road I notice that the rear trunk door is open and my Pelican™ Storm Case™ IM2370 is gone OMG. Driving back, swearing, looking left and right off the road to see the case (with all the production data and equipment worth 15K Euro). I turn around after the gate, lay the Pelican™ Storm Case™ IM2370, flat on the dirt road. Scratched and dusty, but it’s a Pelican case. Nothing damaged inside, of course.

We are the happiest guys, now having an eye on the trunk door from then on. The production is safe again, with 3 TB of irreplaceable data, stored inside that Pelican™ Storm Case™ IM2370. My Pelican cases are always there for me, and this situation is exactly when they pay off!

Christoph Malta, April 2015, Austria

- Cat. No. iM2050-X0002****

You’ve got equipment to protect, and a Pelican™ Storm Case has been engineered to do just that. With HPX-R™ resin, our proprietary HPX™ polymer is proven to resist impacts even at low-temperature laboratory testing, but the real proof is in the bragging rights that come with survival. Because even a Pelican® Storm Case® unlike any other protects your equipment during downed trees or taking a shot in the center lane of the New Jersey turnpike in a day’s work.
From firefighters, EMTs, outdoor enthusiasts, and law enforcement to industrial engineers and photographers, there is a Pelican™ Storm Case™ for every professional. Built strong in three standard configurations: Pick N Pluck™ foam, padded dividers (on select models) or empty.

**RUGGED IN-LINE WHEELS**
Shielded from dust, dirt and other contaminants – ball bearing wheels provide low-friction, low-drag rolling with retractable handles for easy movement of heavy loads.

**MOLDED-IN LOCKABLE HASPS**
Twin mating hasp holes on the rim of the case allow attachment of padlocks to keep your gear in and thieves out. And check out Pelican’s TSA approved cable padlock. Now you can check your baggage with confidence while flying in the USA. The Travel Security Agency has the key, and you have the combination.

**WITH FOAM, NO FOAM, WITH PADDED DIVIDERS**

PELICAN™ STORM CASE™ SERIES SPECIFICATIONS

From custom nameplates and padded shoulder straps, to TSA Locks and humidity indicators, Pelican offers a broad range of case accessories.

Lid Organizers
Replacement Foam Sets
Padded Dividers
Shoulder Straps
TSA Locks
Pelli Desiccant (Silica Gel)
Nameplates
Card Holders
Caster Wheel Kits
Pallet Risers
Pelli™ Quick Mounts
Lid Stays

Refer to www.pelican.com for specific accessories available for each case model.
PELICAN™ CASE STANDARD PROTECTION

Most Pelican™ Protector™ and Pelican™ Storm Cases are available empty, with foam or Padded Dividers. These configurations are available across our full line of injection molded cases and offer off-the-shelf protection solutions.

PICK N PLUCK™ FOAM

An easy, do-it-yourself system for the interior of the case. Layers of foam are pre-scored in 1/2” or 1” cubes. Simply lay your equipment on the foam, tape or chalk to mark the foam, and pluck away. Always allow at least one inch of foam between your equipment and the case wall.

We offer replacement foam sets online at http://pelicanpro.com. Just enter the case catalog number in the search field to view available foam sets.

Solid foam (which can be cut with an electric knife or coping saw) is preferred for oversize items such as long guns. The following cases ship with solid foam instead of Pick N Pluck™ Foam:

- 1700
- 1720
- 1740
- 1750
- 1770
- iM3100
- iM3200
- iM3220
- iM3300
- iM3410

PADDED DIVIDERS

An alternative to Pelican™ foam is our optional Padded Divider Sets. These durable nylons and foam dividers are extremely versatile. The compartments are connected with Velcro® so you can easily change the configuration according to your needs.

LID ORGANIZERS

Made of simulated leather or ballistic nylon with nylon zippers. A wide variety of pocket sizes protect and keep your gear organized. They install easily with Velcro® strips (included).

ELECTRONIC INSTALLATIONS

Both the Pelican™ Case and Pelican™ Storm Case™ allow customization for electronics. Injection molding provides a reliable, durable, ready-to-ship enclosure with consistent dimensions. The copolymer material can be machined, drilled and sanded smooth.

These properties make the Pelican™ Case and Pelican™ Storm Case™ suitable for use with bulkhead connectors. Attaching equipment to the interior is equally simple using common hardware such as bolts and rivets. The hardware can be made watertight by use of o-rings, rubber gaskets or silicone.

Mounting the entire case to a wall or post is a simple way to create a waterproof control box for field use.

CUSTOM LOGO SERVICES

Personalize the outside of the case with your company logo or have your name engraved on the nameplate (Pelican® Case). Logos can be applied in multiple colors as a Mylar® decal (250 piece minimum) or as a vibrant fade-resistant, scratch-resistant hot-stamped ink.

For prices and further information, please call Pelican Customer Service at 310.326.4700 or toll free at 800.473.5422.
While every Pelican™ case is built tough on the outside, we provide custom services to protect delicate items on the inside. Custom foam and extreme solutions such as deck mount suspension systems and certified laboratory testing will keep your equipment organized, intact and protected through the most volatile conditions.

LOW COMPLEXITY
Custom Foam Solutions

EXAMPLES
• Custom Labels
• Humidity Indicators
• Customizable Cushions such as Polyethylene and Polyurethane in Multiple Densities, as well as other specialty foams

MEDIUM COMPLEXITY
Interior/Exterior Solutions

EXAMPLES
• Shock Mount Metal Decks
• Custom Metal Work
• Cut and Weld
• Custom Bezel Solutions
• Forklift Risers

EXTREME COMPLEXITY
Interior/Exterior Solutions with Testing Requirements

EXAMPLES
• Shock Testing
• Vibration Testing
• Drop Testing
• Salt/Fog Testing
• Pressure Testing

CUSTOM FOAM MADE SPECIFICALLY FOR YOUR EQUIPMENT
Pelican Products provides expert packaging for both of our case lines, and we work with partners who have been in the packaging industry for over 50 years. Save time and cost by purchasing a fast and complete turnkey solution from Pelican!

Our Pelican Case Centers have the most advanced foam cutting tools, and our engineers have the latest software applications so they are able to create a design that is precise and determines the most cost effective method of manufacture.

CUSTOM CASE SOLUTIONS
www.pelican.com/custom

PELICAN ENGINEERS TAKE EVERYTHING INTO CONSIDERATION WHEN DESIGNING YOUR CUSTOM CUSHION:

• Unit Dimensions
• Accessories and Other Items
• Fragility
• Military Specifications
• UV Resistance
• Commercial Spec
• Anti Static Grounding
• Weight (and weight distribution)

ADVANCED CASE SOLUTIONS
ANTI-STATIC POLYURETHANE:
This special foam inhibits the build up of static electricity and helps dissipate any stray static charge. It is an open cell foam that is used for lightweight items such as sensitive electronic equipment, e.g. circuit boards, computer chips, etc.

POLYETHYLENE:
Polyethylene foam is a strong, non-abrasive, water-resistant and resilient closed cell foam. Due to its excellent vibration dampening and insulation properties, it is often used for packaging fragile goods such as communications equipment, power supplies, etc. Available in a variety of densities.

ANTI-STATIC POLYETHYLENE:
Commonly used for shipping electronic parts, circuit boards and computer chips, anti-static polyethylene foam is a strong, non-abrasive, water-resistant and resilient closed cell foam. The properties of the foam slowly dissipate electrostatic charges given off by other components. Used for shock absorption, it is often used for packaging fragile goods due to its excellent vibration dampening and insulation properties.

CROSS-LINK:
Is a non-porous, non-particulate closed cell foam that is often used in a clean room environment (reduces foreign object debris – FOD). It is aesthetically pleasing and resistant to grease, dirt and water. Available in a variety of densities.

ADDITIONAL FOAM TYPES ARE AVAILABLE: FLAME-RETARDANT, CONDUCTIVE, EXPANDED FOAMS...

NOT ALL FOAM IS EQUAL
With over 50 years of professional packaging experience, Pelican engineers utilize sophisticated engineering technology to provide a foam solution that not only serves to protect, but also creates a professional presentation that you will be proud to display. From simple to very complex cushion designs, we know how to provide protection that will get your gear or mission critical items safely to their destination.

CUSHIONING MATERIAL:
POLYURETHANE:
Commonly used, polyurethane is a softer, open cell foam. Best for lighter weight sensitive equipment such as cameras, smartphones and laptops. Available in a variety of densities.

BOTTLES

CUSTOM FOAM APPLICATION EXAMPLES:

• Consumer Products
• Firearms
• Computers
• Calibrated Optics
• Tools
• Video Equipment
• Bottles
• Paintings
• Musical Instruments
• Collectibles
• Any Item That You Value and Need To Protect

CROSS-LINK:
Is a non-porous, non-particulate closed cell foam that is often used in a clean room environment (reduces foreign object debris – FOD). It is aesthetically pleasing and resistant to grease, dirt and water. Available in a variety of densities.

ADDITIONAL FOAM TYPES ARE AVAILABLE: FLAME-RETARDANT, CONDUCTIVE, EXPANDED FOAMS...
While foam is generally the first choice for protection, heavy or extremely fragile equipment sometimes requires fabrication of custom deck mount suspension systems to secure equipment. Cradle mounts are also the choice when the equipment can only be supported in precise locations. Pelican’s machine shop is world-class, with plasma cutters, certified welders and finishing services demanded by the aerospace, defense and medical industries.

**DECK MOUNT SUSPENSION SYSTEM**

While foam is generally the first choice for protection, heavy or extremely fragile equipment sometimes requires fabrication of custom deck mount suspension systems to secure equipment. Cradle mounts are also the choice when the equipment can only be supported in precise locations. Pelican’s machine shop is world-class, with plasma cutters, certified welders and finishing services demanded by the aerospace, defense and medical industries.

**VIBRATION CONTROL**

Small but constant vibration during transport is very destructive to the equipment inside a case. Pelican uses elastomer shock mounts, cable shock isolators, hard mounts, and foam that isolate the payload from case walls. Specialized foams can also mitigate vibration; our engineers understand the properties of foam to specify the type that is right for your requirements.

**LAB TESTING**

Military and OEM customers may need to certify the case will perform to specific requirements. Under precise control conditions we subject our cases to a battery of rigorous lab tests including drop, vibration, leak, heat and dust tests.

**VIBRATION TEST**

- L.A.B. servo hydraulic vibration system; 0 – 300 Hz.
- Sinusoidal with pre-programmed profiles for:
  - ISTA Integrity Test Procedures 11800, 14200, 1A, 1B, 1C, 1D, 1E, 1F, 2A and 2B.
  - FED-STD-A492
  - 3 – 50 Hz sweep with 1G constant input
  - 1-inch dwell for loose cargo bounce
  - MIL-Std-660C; S.3.2
- Random Vibration with pre-programmed profiles for:
  - ASTM 4169 Air levels 1, 2 and 3
  - ASTM 4169 Truck levels 1, 2 and 3
  - ASTM 4169 Rail levels 1, 2 and 3
  - ISTA Integrity Test Procedures 1E, 1H, 1C, 1D, 1F, 3C, 3D, and 3E.

**IMPACT TEST**

- Falling dart – 64” drop height with darts weighing between 5 and 15 lbs.
- Penetration test for category 1 containers - ATA 300 paragraph B-2-5

**THERMAL TEST**

- Walk in environmental chamber 6-foot wide by 8 foot high and 8 feet deep with a thermal range of -100°F to 200°F.

**IMMERSION TEST**

- Internal dimension of the chamber is 54” x 30” x 36”H. Able to simulate immersions up to 2 meters.
- Small immersion tank capable of 1 meter on small IM cases.
- 80-inch deep large immersion tank

**RAIN TEST**

- Small rain chamber capable of up to 6 inches per hour.

**PNEUMATIC PRESSURE TESTING**

- 100” and 80” water manometers
- 100” mercury manometer
- Digital manometer – 10 psi max.

**MUTUOYO® HARDNESS TESTER**

- Metal evaluation of product used in cases.

**COMPRESSION AND TENSILE TESTING**

- Instron compression tester, model 3367.
  - Load range of 6000 lbs on small items.

**LEAK TEST**

- Immersion: 54” x 30” x 36”H chamber.
- Rain: Small rain chamber capable of up to 4 in. per hour.
- Pneumatic Pressure: 100” and 80” water manometers, 100” mercury manometer.
- Digital manometer – 10 psi max.
