**THE 9440 REMOTE AREA
LIGHTING SYSTEM**

**ZERO TO
DAYLIGHT
IN UNDER
TEN SECONDS.**

2400 LUMENS DEPLOYED IN A SNAP

9440 Remote Area Lighting System

The most innovative RALS unit to date, the 9440 moves fast to light up ravines, confined spaces, riverbanks... anyplace generator lights can't go. Deployed in under 10 seconds, the mast extends 7 feet high, shining light over low obstructions encountered by traditional lantern style lights. With a 120 degree beam spread and up to 2400 lumens, the entire area will have the light you need for a safe and swift operation.

The 9440 is maintenance free and RoHS Compliant, using super tough LED lamp modules and NiMH batteries for up to 6 hours of continuous light.

As fast and easy as 1-2-3.
The 9440 deploys in less than 10 seconds to a height of 7 ft. (213cm)

GUARANTEED FOR LIFE
